plemented by an analysis of texts. The texts themselves, of which only a few examples are given in this monograph, and the vocabulary have been checked and rechecked with informants and may be taken as representing with fair accuracy the Pukapukan dialect. Data on economic life and the material culture are reliable. The material on Pukapukan religion and its interrelations with other aspects of the culture, particularly with economic and social life, is definitely weak and represents a type of historical reconstruction based on informants' accounts supplemented by textual material. None of the informants were living during the days when Pukapukan religion actually functioned.

This study of Pukapukan culture is, in the main, a presentation of the more formal patterns of behavior which have been abstracted from the total culture by ourselves or our informants. It is likely that the contents of this monograph, if imputed to one or all of our informants, would in no sense be recognized by him as significant formulations of all his cultural experience. We believe he would recognize that the majority of the statements contained herein hold true in one sense or another for some aspect of his experience, and it is this belief and the fact that the formal patterns of Pukapukan society configurate fairly well with the patterns of other Polynesian communities that are the sole guarantee of the measure of truth in the generalizations presented.

The ideas and action patterns grouped together under the title of Pukapukan ethnology would have endlessly different meanings for the various informants. It is just these personal valuations, symbolisms, and implications which the cultural set-up of modern Pukapuka makes so difficult to annotate and which attest to the continued vitality of Pukapukan culture as [184] a functional entity. Much of Pukapukan culture as here presented is the peculiar property of but few individuals in Pukapuka today. The imprint of informants' personalities is contained in all the information so freely imparted, but it is woven into the context of the information in a fashion that defies analysis, though it is none the less real. This is most striking in the realm of religion or in the chants. Full participation in the latter as a cultural value is probably limited to no more than a few individuals of the 600 odd Pukapukans living on the atoll today. The remainder have vague or ill-defined ideas about the meanings of obscure passages in the chants, though any vigorous-minded Pukapukan will, on challenge, make up immediate rationalizations to cover his own lack of authentic understanding. This in no way vitiates the value of these chants as an aid to the recapture of old-time customs. These customs and symbolisms are preserved in them, waiting only for the analyst's attention.

The following pages attempt to work out the main forms of Pukapukan culture, to hint at certain time sequences, and to indicate a few geographical
